

LIQUID JUST GOT SMARTER.

EXPERIENCE THE MOST INTELLIGENT SALT SYSTEM ON
THE PLANET, NOW WITH PRECISION DOSING.

freshwater[®] IQ

Smarter Water Starts Here.

Take the guesswork out of spa care with FreshWater® IQ. Our fully integrated smart salt system works quietly behind the scenes to help keep water clean, clear, and balanced.

Powered by three advanced technologies, the FreshWater® Salt System, Smart Monitoring System, and new Dosing System, FreshWater IQ makes water care simple and delivers consistently fresh, natural-feeling water, so you can relax and focus on what matters most.

Water Care That Works For You.

FreshWater® IQ is the key to getting the maximum benefit possible from your hot tub. It supports your wellness routine by helping to keep your water clean, clear, and balanced. With smart technology at work, your spa is always ready when you are.

THREE INNOVATIVE TECHNOLOGIES. ONE SEAMLESS EXPERIENCE.

FreshWater IQ blends three game-changing innovations into one integrated solution:

FRESHWATER SALT SYSTEM

Converts salt into chlorine using a disposable titanium cartridge to keep your spa water fresh, clear, and natural feeling.

SMART MONITORING SYSTEM

Automatically checks your water every hour and gives you clear guidance through your spa's touchscreen control panel or Caldera® Spas app.

NEW! PRECISION DOSING SYSTEM

Dispenses the exact amount of pH Up, pH Down, and Phosphate Remover when you need it with no measuring or mess using refillable cartridges incorporated neatly under the filter lid.

freshwater® IQ

Smarter.

REAL TIME MONITORING.
PRECISION DOSING.

FreshWater IQ uses built-in logic to monitor your water's pH, chlorine, and salt levels hourly, and delivers clear, step-by-step instructions right to your spa's touchscreen or smartphone.

Need an adjustment? Just tap. Our new dosing technology lets you instantly add pH Up or pH Down or schedule an automated dose of Phosphate Remover, no guesswork required.

Cleaner.

BETTER WATER. FEWER CHEMICALS.

Our salt system generates chlorine from salt, so fewer chemicals are required. Combined with automated monitoring and precise dosing, it helps keep water crystal clear, gentle on skin and eyes, and fresh for up to a full year*.

Simpler.

LET YOUR SPA DO THE THINKING.

FreshWater IQ takes the guesswork out of water care. Smart alerts, step-by-step instructions, and automated dosing make it the easiest system we've ever built.

Better.

THE FUTURE OF WATER CARE IS HERE.

Fully integrated and intelligently designed, FreshWater IQ helps deliver clean, balanced, and natural feeling water with less effort, so you can soak more and stress less.

*Water life varies with use and care. With proper maintenance, spa water can stay fresh for up to one year.

Introducing the Reimagined Caldera® Spas App.

TOTAL CONTROL. TOTAL FREEDOM.

Enhance your FreshWater® IQ experience with the Caldera Spas app, your digital spa companion that keeps you connected to your hot tub, wherever you are.

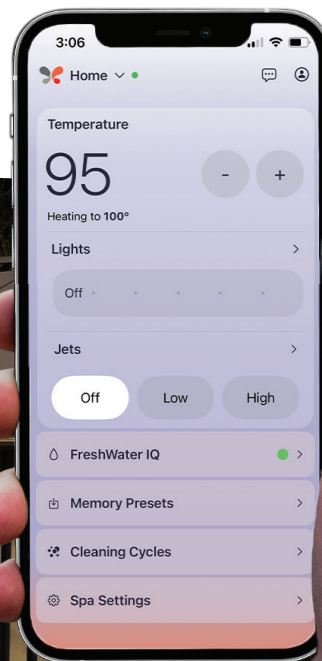

WITH THE APP, YOU CAN:

- ✓ Monitor pH, chlorine, and salt levels
- ✓ Trigger water care dosing from your phone
- ✓ Adjust lighting, temperature, and jet strength
- ✓ Activate Clean Cycle or Energy Saving Mode
- ✓ Manage a spa at a second home or rental property
- ✓ Chat with your AI-powered support assistant—24/7

DO I NEED THE APP TO USE FRESHWATER® IQ?

Nope! Your spa's built-in control panel gives you full functionality. However, the Caldera Spas app adds the freedom to manage your spa anytime, from anywhere.

Available on the App Store and Google Play. The Caldera Spas app is powered by the Connected Spa Kit, which is a dealer-installed option available on all Utopia and Paradise spas from 2024 onward, and with Vacanza Series spas from 2025 onward.
